- > DOCSYS – Document System with Specification and Drawing Management
- > Security Levelling
- > Private Menus
- > Multi-Company and Multi-Branch / Division Options

**ALSO DEVELOPED** by the *iPROsoft* team, in parallel with the package, is **U-LAUNCH™**.

With **U-LAUNCH™** users can define their own paths of navigation through data capture, enquiry and report programs, only constrained by permissions. Extensive drill-downs are but a small part of this advanced technology, which offers massive increases in efficiency, and ease of use.

*iPROsoft* is compatible with Microsoft SQL, Pervasive SQL, Oracle and IBM's DB2 databases. The package is a 32-bit Windows application and functions with Microsoft Windows 98, NT, 2000 and XP+ Microsoft Windows operating systems.

*iPROsoft* Pty Ltd is committed to developing fully all its own software modules, properly integrating administration and accounting functions.

The company also believes appropriate interfaces to third party products can be advantageous, however the weaknesses in conjoined systems are always at the interfaces and careful management is required.

Naturally, the company recognises the concept of 'best of breed' and to this end carefully selects alliance partners who can offer complementary areas of specialisation, thus optimising value to end-users.

Simplicity and ease of use are paramount in the design of *iPROsoft*, and together with quality documentation, support and training, form the essential attributes of the system's implementation and on-going development.

Support for *iPROsoft* is direct, prompt and as detailed as required. Support of critical software applications is vital to people using the applications to administer their projects and businesses. Significant resources being available for support is of critical importance.

*iPROsoft* is regularly upgraded to maintain compliance with regulations and market requirements and to take advantage of technological developments.

So, what does all this mean?

The *iPROsoft* Enterprise Software Solution can do so much, achieve so much, and reliably look after one or one hundred plus log-ins simultaneously. It can increase your efficiency, it's easy to use and is a revolution in the project and service sector.

Its track record is proven and the sites where it is installed are testament to the robustness and security of the package.

*iPROsoft* Pty Ltd believe it's the best in the world and invite you to review it personally.

*iPROsoft* – the intelligent solution for project and service enterprises.

## MADE TO MEASURE *iPROsoft*

*iPROsoft* is tailored for its intended audience. Just the same "Made to Measure" services can make an exact fit to match unique requirements.

Adaptations can range from minor fine-tuning all the way through to major design and construct software projects. *iPROsoft* have completed significant bespoke software undertakings covering foreign aid projects, quality assurance schemes, superannuation, process control and of course, continuing *iPROsoft* development.

You can use the project, design and technical expertise of the *iPROsoft* team to ensure the software solution meets your unique requirements.

## COMPANY HISTORY

*iPROsoft* Pty Ltd grew out of the particular needs of the construction industry. The company founders, who head up the company today, managed a number of turnkey projects in the utility, mining and industrial sectors throughout Australia and New Zealand. They were driven by the requirement for good, robust software, which did not exist.

The software package, *iPROsoft* was created and underwent stringent field testing prior to market release in 1989. Commercial construction and trade contractor companies were invited to test the package and to try and break it.

The subsequent results were good. Not only could the package perform the required tasks but it was robust and secure as well.

Confidence by customers in *iPROsoft* has been the backbone of its commercial success. *iPROsoft* has been revised and re-released each year since commencement to keep pace with market requirements and regulations and to take the best advantage of contemporary technology.

Uncompromising commitment to the quality path has enabled the *iPROsoft* package to be the leader in its field in providing capability, performance and reliability.
