

Welcome to the September 2008 edition of the iPROsoft Newsletter, featuring news from our clients and feedback from our national community forums.

Please [email us](#) if you have any feedback, would like to be mentioned, or would like to subscribe to iPROsoft News.

iPROsoft Version 3.0 To Be Released!

November will see the release of iPROsoft Version 3.0 released to the Australian market.

There has been considerable system expansion, such as an increase from 99 milestones, to 999 milestones, a sub-contract orders explorer, and improvements to the refresh rate and loading speed of U-Launch Explorers.

The release will also include significant enhancement to forecasting, fixed assets, scheduling, general ledger and utilities.

The November Community Forums will provide you with an opportunity to view the features of the upcoming release. To register for this event, [email us](#).

iPROsoft Community Forums

iPROsoft delivered a community forum around the country in August with a focus on Managing Service Works with iPROsoft.

All of the sessions were well received with many attendees taking the opportunity to network with their peers from other iPROsoft client companies. Some of the feedback we receive from our clients for these Community Forums:

97% of attendees rated the sessions as Excellent to Good

Other than an opportunity to learn more about the system, these sessions offer an opportunity for you to meet some of the iPROsoft support staff and your peers from other iPROsoft clients.

Upcoming Events November

Community Forums:
Sydney 18 November
Melbourne 19 November
Brisbane 20 November
Adelaide 26 November
Perth 28 November

December

iPROsoft Christmas newsletter, including iPROsoft office closure dates

West End, Qld, 4101

Why not come along to the November Community Forums and see what makes them so great. Dates for the upcoming November Community Forums are listed on the right. Invitations will be emailed to you in October, but should you wish to register early for this event, [email us](#).

2Construct

iPROsoft has clients throughout Australia servicing a variety of sectors. One of those companies is [2Construct](#). This is a dynamic company and one of the few construction companies in the State of Victoria that has knowledge and experience covering most aspects of multi faceted project delivery.

The founding Directors of 2Construct have had vast experience in the Building, Commercial, Industrial, Civil Engineering and Civil Landscape sectors of the Construction Industry in both Metropolitan and Regional Victoria and are well recognised in the industry for on time, on budget and quality project delivery.

iPROsoft System Tips - Managing Employee Qualifications

There are a number of qualification programs in iPROsoft that can be used to not only help you manage employee qualifications, but also licences, probationary periods and other incremental dates.

These records can be set up to raise a warning in E353 - Timesheets and Pays to advise when an employee qualification or licence has expired. An additional report, R3031 can be run to check the status of qualifications, which can either be run to provide a summary or detailed listing of employee qualifications.

The list of qualifications and licences is user definable and can be set up in accordance with internal company requirements. Also, the data entry of these qualifications and licenses can be either direct into the system, or imported via a .csv file. Give our support staff a call should you require more information on this feature.

Welcome to Trico and Coolmaster

The first two months of this Financial Year have brought two new additions to the iPROsoft user community. Trico Constructions, a building firm located in Sydney with extensive experience in commercial building refurbishment and office fitout.

The second addition is Coolmaster, a South East Queensland based HVAC and mechanical services organisation with over 30 years experience.

Industry Happenings

Do you have news you would like to share? Have you opened a new office, or moved offices? Won a large contract? Announce it here - [email us](#) and we can include it in our next newsletter.

Movie tickets - the first person to [email us](#) with the words 'movie tickets' in the title will be sent 2 free movie tickets.

All of the team here at iPROsoft wish you and your colleagues a happy and safe Christmas and New Year and we look forward to working with you through 2009.
